Tim & Chuck:

NSTAR has asked us to move our Node 5B on Basin Rd. at Meneshma one pole over (100' west) as shown in the attached overview photo. NSTAR's reason was that they have future plans to extend primary power to the pole we applied for. We were not made aware of such plans until now. Close up photos of the pole NSTAR is moving us to are also attached.

Is any formal process necessary from the Town's perspective? My read of the original Grant of Location (petition attached) suggests that the only difference is to the coordinates listed – 4+ digits to the right of the decimal point.

I appreciate your feedback – our concern is impact to the December network launch schedule.

Regards,
- John
