Subject: Gehrlicher Solar/ Gosnold Road Project

Dear Mr. Carroll,

Thank you for your time on Wednesday and I appreciate your helping me understand the potential need for solar in Chilmark and Menemsha . Gehrlicher is a global solar installer with more than 300MW installed and \$500 million in revenues in 2010. We have developed more than 4MW of solar in Massachusetts with several of those projects being brown field sites.

We have been asked by the Harris family to evaluate the development of a 2MW array on their property located at 2 Gosnold Rd. This project is viable only if the town is willing to purchase the power from the array through a virtual net metering agreement. We would welcome the opportunity to discuss with the town council our proposed plan and to determine if there is a financially prudent way for Gehrlicher to coordinate our project with those currently being considered by the council and the town.

Please feel free to contact me should you need additional information and thank you for your consideration in advance.

Sincerely,

Mark Waters
Regional Manager
