Subject: FYI. RFQ is now available for the Municipal LED Streetlight Project 07.12.2013

Dear Town, Fire District lead contacts and all involved: The procurement package (Request for Qualifications per Ch 25A, Sec 11I - Guaranteed Energy Savings Contract) is available and posted on our website at <http://www.capelightcompact.org/resources/request-for-proposal/>

Thank you for all the assistance including support before your Boards and Committees involved in advancing this effort over the past few months. A number of participants did include Exhibit A Special Terms and Conditions to your signed Participation Agreements that are reflected in this package. Note: For those who did not add Special Terms & Conditions, as you'll see, the Minimum Technical Specifications are extensive and we will have an opportunity to review the proposed fixtures prior to final order and installation.

The next major activity coming up will be the pre-qualification conference set for Tuesday, July 30 from 3:00 pm - 4:00 pm that is mandatory for all interested proposers. You are welcome to attend this and I will follow up with the conference room when we have it confirmed.

Let me know if you need any information on this project and please pass this message along to anyone who I may have missed on the email distribution.

Thanks you,
Kevin Galligan (508) 255-2036
Energy Efficiency Program Manager
