Re: Clambelly Hearing Next Week

Hello—. I just wanted to say that regarding 16 Clambelly, we have done considerable cleanup, at least pertaining to landscape equipment and supplies. However we had a problem with the bobcat of which we are awaiting a part. Also an attachment remains that we need the bobcat to move. The fishing gear and relevant equipment remain in and around the yard and house, however I think the focus is on the landscape business, not what Mr Simon and Young can see around my house. I think we are trying to keep young people here on the island (especially if they were born and raised here). I also want to point out that there are three landscape companies that work for people on Clambelly, one of which comes weekly, early in the morning and use leaf blowers to clear the yard of a neighbor of Trina's. There are three propane companies that service houses on Clambelly as well as two different Garbage Companies. Vinny only has 2 employees, however I have occasional people to help with fishing gear or visitors. There is no gathering early in the morning or loud conversions. I think we have addressed the visibility of trucks and equipment sufficiently, however if need be maybe we can work something out with Trina to satisfy her complaints. Again, since a new neighbor plowed up the buffer and opened up views of each house, closed off a shared driveway that 3 of us used to use, forcing us to create and open up more land to satisfy the FireChief. I do hope my Son is granted permission to continue operating his business. Thankyou.
