

CONTRACTOR NOTES:

1. The sewage ejector basin shall be 3' by 4' Solid Concrete chamber or approved equivalent and be insulated against freezing.
2. Ejector pump shall be a Liberty LE-50 or approved equal, Non-Grinder type and capable of passing a 2" solid (see 310 CMR 15.229 for additional requirements).
3. The force main shall be buried to a depth of 4 ft. or insulated in accordance with the force main detail.
4. The building sewer from the garage to the ejector pump shall have a minimum slope of 2%.
5. This design does not warrant the location of underground pipes, wires, utilities or other underground structures. The installer shall be responsible for locating and relocating these objects as necessary.
