### CHILMARK

Is seeking quotes for the replacement of the Kohler 20Kw backup generator at the Community Center, 520 South Road. We are requesting a propane fired 24Kw generator, equal to or better than an air-cooled Generac 24KW, that is suitable for use at the community emergency shelter with run time of no less than 72 hours continuous load. This installation quote shall be all inclusive of any and all services necessary to provide a "turn-key" solution. The generator should be available for installation within 30 days of acceptance of the quote. This site has a Photovoltaic array on the roof that produces electricity using AC micro-inverters. A future whole building battery back-up (ie. Tesla/enPhase/GeneracPWRcell) is planned and this installation should take those installation needs into consideration. Please contact [townadministrator@chilmarkma.gov](mailto:townadministrator@chilmarkma.gov) for additional information and to schedule a site visit.

Run this one time on Friday please.

Dilly – please email a copy of this to any electrical contractors that you know have pulled generator permits in the past 6 months or so. Please also email a copy to our current vendor David Steere.

Jen – Please post this Tuesday.
