Subject: 18 Austin Pasture ~ New Water Line

Hi Leanne,

Apologies for the delaying in sending Site Review Information on the project at 18 Austin Pasture.

In reviewing the minutes from the meeting on February 12th, the Site Review Committee did not vote on the new water line at the meeting. The Site Review Committee only voted to approve the plan for the pool as presented, which is unfortunate since the fact that the site plan showed the septic system overlapping with the pool location was not addressed.

I spoke with the Board of Health Agent this morning and, to date, a new site plan showing a new location for the the septic has not been received.

The Site Review Committee did make one comment about the water line which was that precautions should be taken during the installation.

The Squibnocket Pond District Committee did discuss the new water line specifically. A motion by SPDAC was made to approve the project with the caveat that the Conservation Commission review the isolated wetland in relation to the proposed work.

Please let me know if you have any questions.

Thank you.

Sincerely,
Alison
