**Re: 15 Marsh Road Water line replacement**

**Date: 01/11/24**

**Project description:**

**1" water line replacement from the existing Menemsha Water Company water main to the existing home located at 15 Marsh Road Map 27.1 Lot 31. Existing water line currently runs over ground and across a minimum of 3 properties.**

**Installation process:**

**Excavate the existing water main located on Larsen Lane using a mini-excavator. Excavate a hand hole at 15 Marsh Road using hand shovels. Directional drilling to be provided by Fenner excavation. Directional drilling instead of actual trenching will allow for the water line to be installed with no vegetation to be disturbed.**

Sincerely,

Brian Packish
