- WF1 Δ Denotes Wetland Flag Found
 - Denotes Edge of Wetland
 - Denotes Approximate Stonewall
 - Denotes Edge of Clearing
 - Denotes Limit of Work/silt barrier
 - Denotes Wetland area

- CONSERVATION NOTES:
1. Existing traveled surface to be expanded from 9.5' wide to 12' wide.
 2. A new turnout to be installed as shown.
 3. existing culverts to be removed and replaced with 12" ADS corrugated pipe. Pipes shall be extended as necessary to accommodate widened road.
 4. Road surface height shall be lowered to 24" above the adjacent bottom of channel/swale.
 5. Widened road surface shall be constructed to minimize disturbance to existing road shoulder and adjacent wetland vegetation. The road edge may shift up to 12" North or South as appropriate.
 6. The contractor shall coordinate a pre-construction site visit with the design engineer and Chilmark Conservation Agent prior to any work.
 7. The design engineer shall work with the contractor to determine and approve the appropriate location and height of road surface prior construction.
