RE: Emergency path repair over Lucy Vincent cliff area update

DT: April 15, 2024

I have walked the path with C. Stoeber and Jim Glavin.

Follow up from our walk

I have purchased wood stakes to better close off areas that are too close to the edge and new signage. I will be taking out the old metal post that are currently closing off some areas.

Jim Glavin has agreed to do the repairs if approved to the path. He recommends to use a small tractor with a brush cutter so he will have better control navigating large rocks and any trees.

The width of the path should be at least 6 feet wide so the ATV/UTV can travel and room for any walkers can get out of the way.

I hope I have answered all the questions to move ahead with a hearing.
